The University industry partnerships over the years have led to critical creativity clusters around the world.

Many of these clusters have attracted both talent and treasure in incredible new ways.

Sustaining this link is critical to ensuring an steady supply of smart innovative young people who can help drive industry growth in the nation.

WELCOME TO THE

4TH REVOLUTION

Activate Windows
Go to Settings to activate

The future is suddenly upon us as a people. We haven't been prepared for what's coming given our intellectual and cultural antecedence as a people.

But we do not have the luxury of time. The fourth revolution is in fact an evolution. Some nations will have to be acquired by some corporations in the future to keep them from going extinct.

Nigeria sits on a multi-billion dollar natural resource belt, but has failed to make the critical transition from geography wealth to anthropological wealth. That transition started elsewhere in the world during the second revolution around 1870

The Revolutions

- 1 **1784** Steam power, water power, mechanical production and equipment
- 2 **1870** Division of labour, electricity, mass production
- 3 **1969** Electronics, IT, automated production
- 4 **Tomorrow** Infosphere, cyber physical system
